Re: Crowngate Construction

Crowngate Construction were appointed as the contractor to deliver the new GP surgery in Canley and so we worked very closely with them during the building phase of the scheme. They were always very responsive, willing to listen and accommodate our requests and were always willing to answer any questions that we had.

The project was completed on time and within budget, and we had a very good working relationship with them during the whole process. We were kept informed, we were asked our thoughts and opinions at key stages and we were able to be involved as much or as little as we wanted.

We are very happy to write this recommendation as we found them to be very willing, very accommodating and a pleasure to work with. Since the completion of the building and since we have moved into the new surgery, we have been delighted with the building and how much it has benefited us as a GP practice and our patients.

Signed

Matthew Grant
