To Whom It May Concern,

Re: Crowngate Construction

Crowngate Construction were appointed as main contractor on two projects in Coventry, Forum Health Centre and Forrest Medical Centre. Both projects involved extensive end user/client engagement, as both involved the relocation of current GP surgeries into a new build facility. In the case of Forum, this was more relevant and day to day, as the existing GP service was kept live and operational whilst the new build was delivered in close proximity to a patient/staff/visitor environment.

Both the Forum and Forrest projects were delivered to the contract budget, £1.9m and £1.45m respectively and both projects finished on time to enable the respective practices to maintain a service and honour appointments for their patients.

Both of these projects have received accolades from the end users and their patients, and in the case of Forum, the project has received a number of awards and highly commended within the design and construction industry.

Yours faithfully,

Richard Kinnersley MCIOB
Director
