Dear Raza,

I would like to thank you for the new end of terrace house that you built for me. I am absolutely delighted with the quality of the house, the approach you and your team took during the construction and the overall costs.

Although a relatively small project, approximately £200K in total, being next to a 200 year old building presented many challenges beyond what you would normally expect for such a build. If I had to name one thing, it was how you approached these problems that set you and your team apart from other contractors that I have used.

I look forward to working with you on future projects.

Yours,

Richard Jeffery
Director
