Holly Cottage, Snitterfield

20th December 2021

We employed Crowngate Construction to build a new kitchen extension onto our 18th century cottage in Snitterfield and to move the old ground-floor bathroom upstairs. From our first meeting we were highly impressed by the professional manner in which their entire team approached the project. Throughout, Raza's people were punctual, friendly and committed to providing workmanship of a very high standard. Their work included complete rewiring and a new central heating system; both were accomplished by accredited specialists who were prepared to advise and be flexible if our ideas changed.

Inevitably such a major undertaking involved impacting the day-to-day lives of our neighbours but by communicating directly with them, Raza kept their disruption to a realistic level and by completing the works promptly reduced any stress caused.

We are delighted with our "new" home which has been transformed and is now more spacious and much warmer than it was and we have no hesitation in recommending Crowngate – they are superb in every way!
